Photoelectrics, Fibre Optic Sensor Glass Fibres Type PD 60 CNV 20 BP .. T

Product Description

The PD60CNV20BP.. T is a fibre optic amplifier made specific for glass fibres with temperature up to 250° C. The sensor is microprocessor based and has a build in programmable functions such as Teach-In function for fast sensing distance optimising, NO or NC output, Time delay ON or OFF The sensor output is build as a Push-pull output that performs both a NPN and PNP output which are fully

protected against short-circuit, transients and wrong polarity. The sensor is build in a strong 13 x 30 x 60 mm polycarbonate housing for DIN-rail mounting.

The sensors are suitable for applications that require little space and high accuracy such as: Small part detection, tight locations, checking parts, counting, precise part positioning, material handling and assembly and robotics
