

Proximity Sensors Capacitive Thermoplastic Polyester Housing Type CB, Ø18, AC

TRIPLESIELD™

CARLO GAVAZZI

- Capacitive level sensor for solid, fluid or granulated substances
- Featuring **TRIPLESIELD™** sensor protection
- Rated operational voltage: 20-250 VAC
- Adjustable sensing distance 3-12 mm
- Output: SCR with fixed delay of 30 sec.
- Make or break switching function
- LED indication
- High noise immunity
- Non-flush types
- Cable versions
- Fixed output ON-delay of 30 sec.

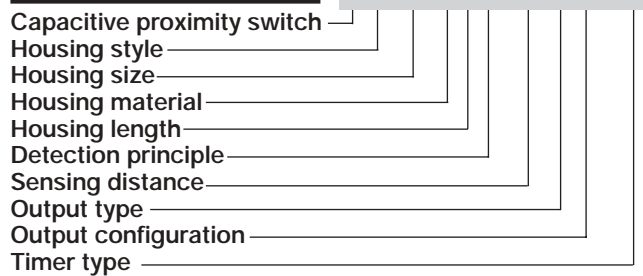

Product Description

Capacitive proximity switches with sensing distance 12 mm non-flush mounted. 2-wire AC output with make (NO) or break (NC) switching. Grey Ø18 polyester housing with 2 m PVC cable. Ideal

for detecting grain or solids as level indicator in tanks, silos or containers. Typical segments: agriculture, food & Beverage, conveyor-belts, plastic & rubber, etc.

Ordering Key

CB18CLN12TOFT

Type Selection

Housing diameter	Rated operating dist. (S _n) ¹⁾	Mounting	Ordering no. SCR/cable Make switching	Ordering no. SCR/cable Break switching
M18	12 mm	Non-flush	CB18CLN12TOFT	CB18CLN12TCFT

¹⁾ Object: Grounded steel plate

Specifications

Rated operating dist. (S_n) CB18CLN12	3 to 12 mm factory set at 12 mm	Environment Degree of protection	IP 67 (Nema 1, 3, 4, 6, 13)
Sensitivity	Adj. 270° turn pot. meter	Temperature Operating temperature	-25° to +80°C (-13° to +176°F)
Effective operation dist. (S_r)	0.9 x S _n ≤ S _r ≤ 1.1 x S _n	Storage temperature	-40° to +85°C (-40° to +185°F)
Usable operation dist. (S_u)	0.8 x S _r ≤ S _u ≤ 1.2 x S _r	Housing material Body	Grey, thermoplastic polyester
Repeat accuracy (R)	≤ 5%	Front	Grey, polyester
Hysteresis (H)	4 to 20% of sensing distance	Cable end	Polyester
Rated operational volt. (U_B)	20 to 250 VAC (ripple incl.)	Connection Cable	Grey, 2 m, 2 x 0.5 mm ² Oil proof PVC
Ripple	≤ 10%	Weight Cable version	110 g
Rated operational current (I_a) Continuous	-25° < to 65°C I _e ≤ 500 mA	Approvals	UL, CSA
Short-time	65° < to 80°C I _e ≤ 350 mA < 2.5 A (max. 20 ms)	CE-marking	Yes
Min. load current	≤ 10 mA		
Voltage drop (U_d)	≤ 10 VAC (at loads ≥ 20 mA)		
Protection	Transients		
Power ON delay	≤ 100 ms		
Indication for output ON	LED, yellow		

Dimensions

Wiring Diagrams

Adjustment Guide

The environments in which capacitive sensors are installed can often be unstable regarding temperature, humidity, object distance and industrial (noise) interference. Because of this, Carlo Gavazzi offers as standard features in all TRIP-LESHIELD™ capacitive sensors a user-friendly sensitivity adjustment instead of having a fixed sensing range, extended sensing range to accom-

modate mechanically demanding areas, temperature stability to ensure minimum need for adjusting sensitivity if temperature varies and high immunity to electromagnetic interference (EMI).

Note:
Sensors are factory set (default) to maximum rated sensing range.

Installation Hints

Capacitive sensors have the unique ability to detect almost all materials, either in liquid or solid form. Capacitive sensors can detect metallic as well as non-metallic objects, however, their traditional use is for non-metallic materials such as:

- **Plastic Industry**
Resins, regrinds or moulded products.
- **Agriculture**
Feed, solids or grain.

- **Wood Industry**
Saw dust, paper products, door and window frames.

Materials are detected due to their dielectric constant. The bigger the size of an object, the higher the density of material, the better or easier it is to detect the object. Nominal sensing distance for a capacitive sensor is referenced to a grounded metal plate (ST37). For additional information regarding dielectric ratings of materials please refer to Technical Information.
