

Monitoring Relays 1-Phase AC/DC Over Current Types DIA01, PIA01

CARLO GAVAZZI

DIA01

PIA01

- AC/DC over current monitoring relay
- Current measured through internal shunt
- Measuring range 0.5 to 5 A AC/DC
- Adjustable current limit on relative scale
- Adjustable hysteresis
- Programmable latching at set level
- Output: 8 A SPDT relay normally de-energized
- For mounting on DIN-rail in accordance with DIN/EN 50 022 (DIA01) or plug-in module (PIA01)
- 22.5 mm Euronorm housing (DIA01) or 36 mm plug-in module (PIA01)
- LED indication for relay and power supply ON
- Galvanically separated power supply

Product Description

DIA01 and PIA01 are precise AC/DC over current monitoring relays. Direct measuring or through current transformer. Owing to the built-in latch function, the ON-position of the relay output can be

maintained. The red LED indicates the relay status. Through the built-in shunt it is possible to monitor loads up to 5 A AC/DC.

Mode of Operation

DIA01 and PIA01 monitor both AC and DC over current through an internal shunt. They can monitor AC currents up to 6000 A when connected to a suitable current transformer.

Example 1
(connection between terminals Z1, Y1 or 8, 9 - latch function enabled)

The relay operates and latches in operating position when the measured value exceeds the set level. Provided that the current has dropped min. 4% below the set point (see hysteresis) the relay releases when the inter-

connection between terminals Z1, Y1 or 8, 9 is interrupted or the power supply is interrupted as well.

Example 2 (Standard CT)
(no connection between terminals Z1, Y1 or 8, 9 - latch function disabled)

The relay operates when the current flowing through the transformer exceeds the set level. It releases when the current drops min. 4% below the set level (see hysteresis) or when the power supply is interrupted.

Range Setting

Centre knob:
Setting of current on relative scale: from 10 to 110% of the full-scale value.

Hysteresis:
Approx. 4% of set value, it can be extended by inserting a resistor between terminals Z1, Y1 or 8, 9.

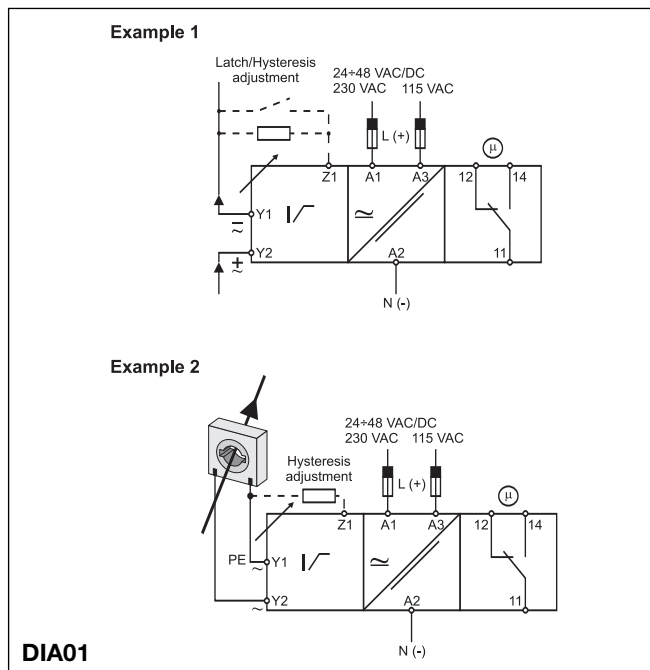

Approx. resistor values:

10%: 180 k Ω
25%: 47 k Ω
50%: 22 k Ω
75%: 15 k Ω
Latch: < 500 Ω
